DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to an apparatus and a method of controlling a hearing aid, classified in class 381, subclass 313.
 - II. Claims 14-15, drawn to a noise reduction system for a hearing aid, classified in class 381, subclass 92.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the hearing aid method and apparatus do not require a directional characteristic with moving null-directions, and an adaptive controller for automatically adjusting the control parameter so as to move a null-direction to reduce the noise signal. The subcombination has separate utility such as an adaptive controller for automatically adjusting the control parameter so as to move a null-direction to reduce the noise signal.

3. Because these inventions are distinct for the reasons given above, the search required for Group I is not required for Group II, have acquired a separate status in the art

Art Unit: 2643

because of their recognized divergent subject matter, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to David Cushing on 08/26/04 to request an oral election to the above restriction requirement, but did not result in an election being made (the examiner could not contact the Attorney).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUYEN D. LE whose telephone number is (703) 305-4844. The examiner can normally be reached on 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, CURTIS KUNTZ can be reached on (703) 305-4708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
